SIGMA Lite

Designed for MorphoAccess SIGMA Lite readers, this stainless steel protective cover shields the terminal in exposed installations. Its housing fits the reader's slim profile while maintaining access to the fingerprint scanning area.

- Stainless steel protection
- Designed for the SIGMA Lite range
- Wall-mounted installation with integrated reader

SIGMA Extreme

The protective cover designed for MorphoAccess SIGMA Extreme provides an additional physical barrier around the terminal. It is particularly suited to installations where reader protection and equipment durability are key considerations.

- Dedicated protective housing
- Designed to fit the SIGMA Extreme
- Additional terminal protection

SIGMA Wide

This stainless steel protective cover surrounds the MorphoAccess SIGMA Wide reader without obstructing its access control functions. It provides additional physical protection for existing installations, specifically designed for this larger terminal.

- Stainless steel protection
- Custom fit for SIGMA Wide
- Particularly suited to existing installations

VisionPass SP

The VisionPass SP Visor is a black metal protective cover designed to shield the VisionPass SP biometric terminal. Available as an optional accessory, it fits around the reader while maintaining a compact design suitable for existing installations.

- Black metal protective cover
- Dimensions: 230 × 110 × 60 mm
- Not compatible with the lower mounting bracket

ACCESSORIES
PROTECTIVE COVERS

MorphoWave

Designed to protect MorphoWave readers, this stainless steel cover provides an additional protective enclosure around the terminal. It is suitable for installations requiring enhanced protection, particularly in outdoor environments.

- Stainless steel enclosure
- Additional reader protection
- Suitable for exposed locations

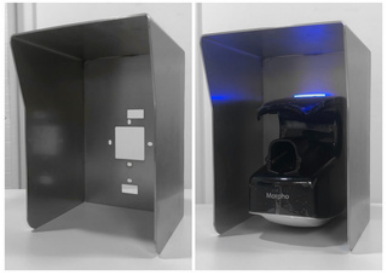

MorphoWave - Visor Rain

IDEMIA's Visor Rain is a protective hood positioned above the MorphoWave reader to reduce direct exposure to rain and sunlight. It provides targeted protection for specific outdoor installation configurations.

- Overhead reader protection
- Reduced exposure to rain
- Reduced exposure to direct sunlight

MA VP Series

Designed for the legacy MorphoAccess VP range, this stainless steel cover protects the reader with a surrounding enclosure. It provides a dedicated protection option for sites still operating these terminals.

- Stainless steel protective cover
- Designed for the VP Series range
- Additional protection for existing installations

ACCESSORIES
MOUNTING SPACERS

MorphoWave

The MorphoWave mounting spacer provides additional clearance for cable connections. It simplifies installation on solid walls and allows cables to be concealed behind the reader.

- Space for cable connections
- Easier installation on solid surfaces
- Cleaner wall-mounted installation

VisionPass SP

The VisionPass SP mounting spacer simplifies installation by creating a 30 mm gap between the terminal and the wall. Made of black metal, it allows the reader to be securely mounted while maintaining a discreet, professional finish.

- 30 mm thick metal spacer
- Dimensions: 150 × 78 × 30 mm
- Supplied with 3 screws for attaching wall mounting bracket

SIGMA Lite

L'entretoise SIGMA Lite facilite la pose lorsque les câbles ne peuvent pas traverser directement le support. Elle crée l'espace nécessaire au cheminement des raccordements, notamment sur les piliers, les murs pleins ou les surfaces difficiles à percer.

- Passage des câbles dissimulé
- Adaptée aux supports pleins
- Finition d'installation plus soignée

ACCESSORIES
STANDS & MOUNTS

Mount – VisionPass SP

The VisionPass SP METAL MOUNT allows the biometric terminal to be secured to a suitable surface, such as a turnstile or a counter at an appropriate operating height. It can also be combined with the dedicated metal floor stand for a freestanding installation without wall mounting.

- Mounting on an existing surface
- Compatible with the VisionPass SP metal floor stand
- Installation adapted to site requirements

Stand - VisionPass SP

The VisionPass SP floor stand enables freestanding installation of the biometric terminal without wall mounting. Combined with the dedicated mounting bracket, it positions the reader at a convenient operating height for access control in reception areas and passageways.

- Stainless steel floor stand
- Compatible with the VisionPass SP mount
- Freestanding installation at operating height

Mount – VisionPass

The VisionPass METAL MOUNT allows the reader to be installed on a desk or counter for enrollment and demonstrations. It can also be combined with the dedicated stainless steel floor stand to position the terminal at a convenient operating height without wall mounting.

- Desk or counter installation
- Compatible with the VisionPass stainless steel floor stand
- Suitable for enrollment and demonstrations

Stand - VisionPass

The VisionPass floor stand enables freestanding installation of the biometric terminal without wall mounting. Combined with the dedicated mounting bracket, it positions the reader at a convenient operating height for access control in reception areas and passageways.

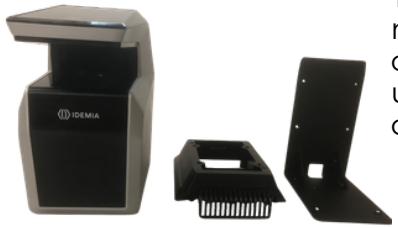

- Stainless steel floor stand
- Compatible with the VisionPass mount
- Freestanding installation at operating height

Stand - MorphoWave

The dedicated MorphoWave floor stand allows the reader to be installed without wall mounting. By positioning the terminal at a suitable height for hand scanning, it ensures convenient operation in reception areas and passageways.

- Freestanding floor installation
- Positioning at a convenient operating height
- Suitable for locations without wall mounting

Tabletop Stand - MorphoWave

The tabletop stand allows a MorphoWave reader to be positioned on a desk or counter. This configuration is particularly useful for demonstrations, testing and certain enrollment operations.

- Desktop or countertop use
- Suitable for demonstrations
- Convenient access to the reader

IDEMIA Product Display Stands

IDEMIA desktop mounts and display stands make it easy to showcase VisionPass, MorphoWave and SIGMA biometric readers. Designed for demonstrations, trade shows and showrooms, they provide a professional way to present the equipment. The standard VisionPass mount can also be used independently on a desk for enrollment.

- Display stands for VisionPass, MorphoWave and SIGMA
- Suitable for showrooms, trade shows and demonstrations
- VisionPass mount suitable for desktop enrollment
